XProtect PDA Client:
Mobile, wireless access to IP video surveillance lets you respond fast!

With XProtect PDA Client, you can check your IP video surveillance on-the-move, right at your fingertips! Just select the cameras you want on your PDA to see live or recorded images. Increase efficiency, save time and resources, ensure faster and more appropriate responses to security situations. Improve safety by checking out what is going on inside premises before entering. Evaluate situations in advance at accident and disaster sites to assist emergency relief services better.

VITAL INFORMATION AND TIMING

◆ Guards can access cameras from anywhere on the premises for total security overview, at any time.
◆ Police and the military can view inside buildings before entering: Are criminals using knives or automatic weapons? How many are there? Where are they standing? Are they holding hostages?
◆ Emergency Services can make pre-evaluations of accident or disaster sites while speeding to the scene themselves: How many people or vehicles are involved? How severe is the incident? How many fire engines, police cars, or ambulances do we need to dispatch? With which kind of medical supplies?

FLEXIBLE VIEWING AND EFFICIENCY

◆ View any video recording or live camera in the surveillance system from a single server or from multiple servers.
◆ To find recordings, you can jump to specific time/date or to next detected motion, or use motion alarm overview.
◆ When viewing recordings, you can playback at variable speed or single step image by image.
◆ When viewing live camera images, control Pan/Tilt/Zoom cameras manually or use preset positions, and control output relays.
◆ The PDA connects to the XProtect Enterprise server using any IP connection, typically wireless LAN, GPRS, etc.
◆ Video compression from the server to PDA optimizes bandwidth usage.

Cameras can be located anywhere in the world. The images are recorded and managed by Milestone XProtect Enterprise and viewable on your PDA with XProtect PDA Client.

milestone

XProtect PDA Client:

Wireless communication and mobile access monitoring combined.

FREEDOM TO ROAM

With Milestone XProtect PDA Client, you simply select which camera to connect with, and view live or recorded images – from anywhere!

Select a camera

VIEWING RECORDINGS

- ◆ Playback forwards and backwards in multiple speeds
- ◆ Single step forwards and backwards
- ◆ Instant motion search
- ◆ Motion alarm overview
- ◆ Go directly to specific time and date
- ◆ Half-screen or full-screen viewing formats

View recordings with playback, single step or instant motion search

SECURE ACCESS

Individual access rights for each camera are determined by user profiles, with log-in protected by user name and password.

PURCHASING

XProtect PDA Client is an add-on product for XProtect Enterprise, licensed per PDA Client, and runs on Microsoft Windows Pocket PC 2003.

VIEWING LIVE IMAGES

- ◆ View live video in half-screen or full-screen formats.
- ◆ Operate Pan/Tilt/Zoom manually to get a closer look at the right area, or
- ◆ Operate Pan/Tilt/Zoom through preset positions.
- ◆ Control the cameras' output relays to trigger external actions like opening doors or gates, turning on lights, etc.
